

SATYARTH SHARMA

Software Developer

Noida, India — +91 8738090222 — sharmasatyarth04@gmail.com — linkedin.com/in/satyarth-sharma — github.com/shsat94

Profile Summary

Software Developer with 1+ years of experience in C#, .NET, ASP.NET Core Web API, and SQL Server. Skilled in REST APIs, backend development, performance optimization, and AI-assisted development using GitHub Copilot and ChatGPT.

CORE SKILLS

Languages: C#, C++, SQL

Backend: ASP.NET Core Web API, .NET, Entity Framework Core, MediatR (CQRS), REST APIs

Software Engineering: Object-Oriented Design (OOD), Design Patterns, Asynchronous Programming, Multi-threading, SemaphoreSlim

Databases: SQL Server, Query Optimization, Indexing, Bulk Operations, Redis

Testing: MSTest, NSubstitute

DevOps & Tools: Docker, Azure DevOps (CI/CD), Git, Linux, GitHub Copilot, ChatGPT

PROFESSIONAL EXPERIENCE

Software Developer — Maven Technosoft Pvt. Ltd., Noida

May 2026 – Present

- Enhanced application security by implementing a **logging sanitization mechanism** in a legacy .NET application, preventing sensitive information from being exposed in **New Relic** logs.
- Diagnosed and resolved issues in the application's **Elasticsearch based search functionality**, improving search reliability and debugging production issues in a legacy enterprise system.

Junior Software Engineer — Data Nova Pvt. Ltd., Noida

Feb 2025 – Apr 2026

- Developed secure payment gateway integrations (**VIPPS, Nets, Nets Easy**) using REST APIs, authenticated webhooks, and idempotent request handling for ERP retail systems processing **50K–100K daily transactions**.
- Reduced checkout API latency from **52 seconds** to **546 milliseconds** by eliminating N+1 queries, introducing bulk operations, and optimizing SQL Server queries.
- Built multi-threaded payment processing workflows using **Task Parallel Library** and **SemaphoreSlim**, while refactoring legacy .NET services to improve concurrency and prevent duplicate order creation.

PROJECTS

Urlx - Scalable URL Shortener

ASP.NET Core, Redis, Postgre Sql

- Built a production-oriented URL shortening service using **ASP.NET Core Web API**, implementing Base62 encoding, Redis caching, and postgre sql for low-latency URL redirection.
- Designed the backend with scalable APIs, cache-first lookups to support high-volume URL generation and redirection workloads.

Phoenix API Gateway

C++20, Linux, epoll

- Built a high-performance TCP server using **C++20**, non-blocking sockets, and **epoll** to handle concurrent HTTP connections efficiently.
- Implemented custom HTTP parsing and benchmarked the server at approximately **50K+ requests/sec** using **wrk** (8 threads, 10K concurrent connections).

OPEN SOURCE CONTRIBUTIONS

- Contributed to the official **Microsoft .NET documentation repository on GitHub** by correcting technical references and improving API documentation links.

ACHIEVEMENTS

- LeetCode Rating 1800+:** Achieved a peak rating of 1800+ on LeetCode through consistent participation in weekly and biweekly contests, demonstrating strong problem-solving and algorithmic skills.
- Smart India Hackathon – Semi Finalist:** Built a geo-tagged multilingual advisory platform designed for scalable real-time information delivery.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering (AI & ML)

Dr. A.P.J. Abdul Kalam Technical University, Lucknow

Jul 2021 – Jun 2025

CGPA: 8.31 / 10
